Increase Terpenes + Cannabinoid Output

TERPS PLUS

TERPS PLUS is a fertilizer enhancer specially formulated and tested as a solution to drive cannabinoid output and terpene production. By encouraging rapid plant nutrient uptake, **TERPS PLUS** promotes and optimizes plant growth, and plant vigor, crop appearance and yield potential.

The garden is super healthy. My garden manager seriously can't speak highly enough about the Microbe Life products.

I'll continue to keep you updated as we run 20-25 different genetics simultaneously. Very happy and a little surprised to see how well it actually works. I now have it running in all 5 of my flower rooms. My garden manager sent me the image in the marketing materials where you claim 6-10% THC and we are pushing that upper limit between the last two rounds, with and without Terps Plus.

THE TERPS PLUS DIFFERENCE

I My business partner went into one of the stores we sell to last week, and the store manager asked what we were doing different with our flower. Said it's never been this good.

it was all the Terps Plus and Photo Plus was another solid piece. Guy said he was heading to the store after his shift to pick it up, and add to his home grow! You've made everyone a believer!
